EDUCATION

King's College London

Biomedical Engineering (BEng)

London

Graduating 2028

- **First Year Average:** 76% | **Computational Statistics Programming Exam:** 99%
- **Relevant Modules:** Computational Statistics, Mathematics, Physics, Mechanics, Computer Programming (MATLAB)

Becket Keys Church of England School

A levels: Mathematics (A), Computer Science (A), Physics (B), EPQ – Sustainable Engineering (A*)

Brentwood, Essex

2022 – 2024

SKILLS

Technical Skills: Python (NumPy, Pandas, Matplotlib, PyTorch), MATLAB, Autodesk Fusion, GitHub

PROJECTS

Clinical Trials and Their Impact on Biotechnology Stock Prices

Present

- Found and read academic research papers investigating the movement of pharmaceutical and biotechnology stock prices before and after clinical trial results were announced.
- Independent data validation – all data pulled from Yahoo Finance is checked for abnormalities in the numbers such as stock-split events.
- Development of functions to pull data for specific stocks as well as detection of abnormal price changes over a specific time period, and top percentage change over a period.
- Continuing to develop this study to see if price reactions are consistent or purely a result of random variation, and when the price reactions occur in relation to the announcement date.

Goalkeeper Game – Hardware Hacks '26

June 2026

- Disassembled and reverse engineered old HP Inkjet printer in order to create a motorised goalkeeper game with sensors
- Took responsibility for the housing of the electronics within the printer by making accurate measurements and designing parts in Fusion which were then 3D printed.
- Wiring of the LCD and motor to the breadboard and ESP32

WORK EXPERIENCE

R&S Carpenters

Essex/London

Carpentry and Fire Door Compliance Administrator

October 2024 – Present

- Submission management of over 200 fire door installations across an NHS Hospital site, where photographic install evidence is checked against compliance standards.
 - Compiled installation documentation as well as door installer certification and sent emails weekly to site Quantity Surveyors.
 - Maintenance of Excel spreadsheet to track which doors have/have not been sent to fire officers, as well as their location in the hospital and who was responsible for the installation.
 - Carpentry on site as well as general labour to maintain safety on site.
-
